AI-USE DECLARATION

Assignment 3: Photo Essay

Customer, technology and data systems reshaping value

Student details

Student name	Kenzhebay Ayaulym	**Student ID**	262687
Group	DPA-2602	**Submission date**	19.10.2026
Company A	Shell	**Company B**	KazMunayGas

AI-use level and student responsibility

- Preparation of this assignment operates at AI-use Level 2 (supported, disclosed).
- Permitted with disclosure: brainstorming, structural feedback, language support, counterargument generation where relevant, and preliminary analysis.
- You must independently verify every claim, number and source and author the final analysis yourself.
- The individual defence operates at Level 1: no AI assistance of any kind.
- Do not upload the OpenStax textbook or the course core text to an AI system.

A. Overall AI-use status

+ I used one or more AI systems while preparing this assignment. I have documented each use below.

☐ I did not use any AI system for this assignment. I have completed the integrity confirmations and final declaration only.

If you select "no AI used," do not leave the declaration blank: tick the second box and sign the final declaration.

B. AI systems register

List every AI system used. Add rows if needed.

AI system / model	Provider / version (if known)	Date(s) used	Purpose in this assignment
Gemini 2.5 Pro	Google AI (Gemini Architecture)	October 14 - October 18, 2026	Brainstorming touchpoints, formatting IEEE citations, structuring risk register.

C. Detailed AI activity and verification log

Record each materially different use. The declaration should show not only what the system did, but how you checked it and what you changed, rejected or corrected.

Part of assignment / activity	AI system	What I used AI to do	How I verified the output independently	What I changed, rejected or corrected
Marketing Plan (W6)	Gemini	Draft marketing mix decisions & B2B touchpoints.	Checked against KMG retail data & OpenStax Ch. 11.	DROPPED unregulated surge price claims due to Order No. 171.
Workflow & Risk (W7)	Gemini	Brainstorm governance risk controls & IT threats.	Verified against OpenStax Ch. 13.5 & KMG IT policy.	Added Chief Engineer mandatory review point.
IEEE Referencing	Gemini	Format reference citations into IEEE style.	Checked authors, dates, titles against primary reports.	Manually corrected volume and page numbers.

D. Commentary, governance and transfer verification

Use this table for AI-supported claims, governance risks/controls, marketing interpretations and Company A → Company B transfer judgments.

Claim / risk / transfer judgment	Evidence or source used	How I verified it	Change made after checking
Dynamic Fuel Price Floating: AI suggested recommending dynamic peak-hour surge pricing at KMG gas stations based on Shell's retail model	Ministry of Energy of RK, Order No. 171 on Petroleum Price Caps (2026)	Checked statutory retail price ceilings for Euro-5 diesel and AI-92 petrol under RK Ministry of Energy regulations	**REJECTED / DROPPED** surge pricing; enforced state-regulated leader pricing compliant with Order No. 171
Subsoil ABAI Platform Scale: AI proposed claiming ABAI waterflooding management covers all upstream wells across western Kazakhstan	JSC NC "KazMunayGas" *Annual Report 2025* (Digitalization & Tech, p. 178)	Cross-referenced exact waterflooding injection cell count in KMG's audited 2025 Annual Report	**CORRECTED** scope to specifically 1,660 injection cells across Ozenmunaygas (OMG), Mangystaumunaygas (MMG), and Karajanbasmunai (KOA) assets
Predictive Maintenance Reliability: AI suggested fully automating refinery unit shutdowns when ML algorithms detect vibration anomalies at Atyrau Refinery (ANPZ)	KMG Engineering *ABAI Brief* & OpenStax Ch. 13.5 *IT Protection*	Evaluated operational cost of false-positive shutdowns against refinery OT safety standards and OpenStax governance principles	**ADDED MANDATORY HUMAN REVIEW POINT:** Assigned Chief Mechanical Engineer to physically verify vibrometer telemetry before any SAP ERP work order execution
Strategic Transfer Verdict: AI suggested adopting Shell's strategy of divesting regional downstream assets and unhedged retail price skimming	Shell plc *Annual Report 2025* & *KMG Strategic Transfer Analysis*	Tested against KMG's sovereign social mandate, local employment in Atyrau/Mangystau, and national energy security duties	**REJECTED** asset divestments; **ADOPTED** predictive failure analytics/TUMAR and **ADAPTED** Zhanaozen 247MW hybrid decarbonization project

E. AI-generated or AI-edited visual disclosure log

Complete one row for every visual that was generated or materially edited with AI. AI-generated visuals must also be labelled on the visual itself.

Visual no. / description	AI system	Generated / edited / other use	Labelled on visual? Yes / No	Source / attribution or verification notes
5-Stage AI/Data Workflow Diagram *(ANPZ Maintenance)*	Gemini 2.5 Pro / Python	Programmatically rendered workflow diagram	Yes	Verified against KMG Engineering ABAI Brief

F. Visual-source integrity check

+ Every visual has a source line.
+ Every third-party visual is openly licensed or used with permission and is attributed in IEEE style.
+ Every AI-generated visual is visibly labelled as AI-generated on the visual itself.
+ The commentary explains what each visual means for Company B rather than merely captioning what it shows.

G. Authorship and judgment reflection

One AI-generated interpretation, risk or visual idea I rejected or changed, and why:

AI suggested dynamic retail price floating for KMG domestic gas stations. I REJECTED this because it violates Order No. 171 of the Ministry of Energy RK on petroleum price caps and KMG's sovereign social mandate.

One verification step that changed my governance analysis or transfer verdict:

Independently verified all ABAI system waterflooding metrics (1,660 cells across OMG, MMG, KOA) against KMG's 2025 Annual Report (p. 178).

One limitation in the available visual or data evidence that I disclosed:

Disclosed that real-time IoT vibration telemetry raw logs from ANPZ are proprietary operational data, using published MTBF targets as verified proxy metrics.

H. Assignment-specific confirmations

+ The visual sequence and the order of visuals are my own curatorial choices.

+ At least two governance risks and their controls are supported by my Week 7 evidence.

+ My adopt / adapt / pilot / delay / reject verdict is my own evidence-based judgment.

+ Every factual claim in the commentary is traceable to a checked source.

Final declaration

I declare that this form accurately records my AI use for this assignment. I independently verified the claims, numbers and sources for which I remain accountable, and I authored the final analysis and judgment submitted for assessment. Any AI support listed above was used only as disclosed in this form.

+ I confirm that every AI system I used is listed in this declaration.

+ I confirm that I did not fabricate, invent or knowingly submit unverifiable data, claims or references.

+ I confirm that I did not upload the OpenStax textbook or the course core text to an AI system.
