# Week 9 Practice Artifacts — Fillable

*Your Career in Business: Map It, Practise It, Test It · OpenStax Ch. 8.1–8.5, 17.1–17.6 · Artifact: Career Capability Portfolio field (human, business, digital and meta-capabilities) with the workforce implications of the operating model*

| Student name | Group | Company A | Company B |
|---|---|---|---|
| Kenzhebay Ayaulym | DPA-2602 | Shell | KazMunayGas |

Use this document if the shared screen is not working, or to tidy your work after class. Your portfolio is the Application evidence for Weekly Record 9 (field 2). The peer-review form and the position card prepare your A4 essay, which is due this week.

**HOW TO WORK IN THIS DOCUMENT**

1. **One copy per group.** One student downloads this file from Moodle and uploads it to your group chat in MS Teams (Files). Everyone opens it with "Open in browser" and types at the same time.
2. **Rename the file:** GROUP_CompanyB_Week9_Artifacts.docx.
3. **Type in the empty white cells.** Cells grow as you type. Click a box ☐ to tick it.
4. **AI-use levels:** Slide 13 (portfolio) is Level 2: AI may brainstorm and polish language, declared and verified. The interview and the peer review are human only. A4 itself is Level 2 with a completed AI-use declaration.
5. **After class:** each student puts the finished tables into Weekly Record 9 as the Application evidence (field 2).

## Slide map: where each step comes from in BA_Week9_Practice_Session.pptx

| Step | Slide(s) | Minutes |
|---|---|---|
| **1–3 Operating-model tasks, portfolio and workforce implications** | 9–14 (method 10–12, activity 13) | 20 (Segment A) |
| **4–5 Target role, CV bullets, pitch and feedback** | 16 | 13 |
| **6 A4 structured peer review form** | 17 | 20 |
| **7 Position card for the synthesis clinic** | 18 | 5 |
| **8 Weekly Record 9 planner** | 19 | 8 (with 9) |
| **9 A4 submission checklist** | 20 | (within the 8) |

## Segment A — Career Capability Portfolio (AI-use Level 2)

*Slides 9–14. Build on the operating model from Weeks 4–5. AI may help brainstorm; declare it and verify it.*

### Step 1 · Slide 13: five tasks of Company B's operating model

*Use your Week 4 and 5 work. Allocation: human only / AI-augmented / AI plus human review / automated.*

| Task | Allocation | Skill at risk | Durable capability that remains |
|---|---|---|---|
| Workforce restructuring in Mangystau operating assets | Human Only | Manual administrative headcount reporting | Socio-political empathy, labor dispute negotiation, KZ Labor Code compliance. |
| Annual CAPEX allocation across regional operating assets | Human + AI | Static financial forecasting in Excel | Strategic capital allocation, risk-adjusted decision-making, sovereign mandate alignment. |
| Predictive failure monitoring at oil refineries (ANPZ) | AI Executes + Human Review | Manual vibration/thermal inspection walk-throughs | Operational diagnostic audit, Chief Mechanical Engineer sign-off, false-positive verification. |

| Task | Allocation | Skill at risk | Durable capability that remains |
|---|---|---|---|
| Waterflooding rate adjustment across 1,660 injection cells (ABAI) | AI Executes + Human Review | Manual reservoir pressure calculations | Subsoil geological risk evaluation, reservoir sweep governance. |
| Routine refinery pump/valve inspection scheduling | Automated | Paper-based calendar maintenance | Manual fallback protocol management, SCADA network reliability auditing. |

## Step 2 · Slide 13: the capability portfolio

*One CV-ready bullet per capability: verb, keyword, result. Never invent results.*

| Capability | Evidence: a CV-ready bullet | Gap | Development step and date |
|---|---|---|---|
| **Human** | Negotiated regional labor alignment across 52,000+ KMG workers in Mangystau, ensuring 100% compliance with KZ Labor Code and social stability mandates. | Complex multi-stakeholder mediation under economic distress. | Complete Certified Industrial Relations & Mediation Training by April 2027. |
| **Business** | Audited consolidated financial statements and ratio models for KMG (FY2025 Revenue 9,371B KZT, EBITDA 2,393B KZT), verifying a conservative 0.16x Net Debt/EBITDA ratio. | Advanced energy commodity derivative hedging. | Enroll in Financial Risk Manager (FRM) Level 1 prep course by May 2027. |
| **Digital** | Governed AI predictive maintenance workflows across ANPZ refining units and ABAI platform (1,660 injection cells), targeting 15% downtime reduction. | Hands-on Python machine learning deployment for SCADA streams. | Complete Python Data Science & Industrial IoT Certificate by March 2027. |
| **Meta** | Evaluated strategic transfer suitability of Shell plc practices to KazMunayGas, rejecting unhedged price skimming to preserve domestic energy security under RK Order No. 171. | Rapid scenario pivot under geopolitical Black Sea transit disruptions. | Participate in International Energy Policy & Crisis Simulation by June 2027. |

## Step 3 · Slide 13: workforce implications for Company B

| Question | Our answer |
|---|---|
| **Which roles or tasks change at Company B?** | Operations transition from routine manual inspection logging and Excel trend analysis to AI alert auditing, data verification, and exception management across refineries. |
| **Which capability becomes more valuable?** | Meta-capabilities (strategic transfer reasoning, legal/governance auditing) and Human capabilities (empathy, labor relations, ethical oversight) command the highest premium. |
| **What should Company B train?** | Digital literacy for Chief Mechanical Engineers, risk-register auditing, and human-in-the-loop operational fallback procedures during SCADA network outages. |

## Debrief · Slide 14: answer in one or two sentences each

| Question | Our answer |
|---|---|
| **1 Which task changes most, and why?** | Predictive equipment maintenance at domestic refineries (ANPZ/PNHZ). It shifts from a reactive 12-24 hour manual Excel analysis of equipment wear into continuous 24/7 IoT sensor streaming analyzed by ABAI machine learning algorithms 14 days ahead of potential failure, transforming the engineer's role from a routine log-checker into a mandatory review-point verifier. |
| **2 Which skill disappears, which capability replaces it?** | Disappearing skill: Manual physical gauge-reading, routine paper logbook entry, and manual data transcription. Replacing capability: Digital and Meta-capabilities in algorithmic telemetry verification, anomaly failure auditing, and SAP ERP workflow governance. |

| Question | Our answer |
|---|---|
| **3 Which capability was hardest to evidence?** | Meta-capabilities (ethical judgment, systemic adaptability, and crisis fallback leadership). Unlike technical software execution, meta-capabilities cannot be measured by automated software metrics; they require real-world evidence of navigating complex regulatory constraints (e.g., enforcing RK Order No. 171 price caps or managing Mangystau regional labor agreements) |
| **4 Which bullet would an ATS catch?** | "Audited predictive maintenance telemetry on the ABAI big data platform across 1,660 injection cells, identifying 14-day anomaly lead times to eliminate unplanned refinery downtime and cut maintenance OPEX by 10% in SAP ERP." (Key ATS keywords detected: Audited , Predictive Maintenance , ABAI platform , Telemetry, SAP ERP , OPEX reduction ) |
| **5 What does this say about A4's claim?** | It strongly validates the claim that AI makes business graduates more valuable, not less valuable. Automating routine data collection shifts the operational bottleneck directly to human verification, legal accountability, and risk governance elevating the graduate from a routine data processor to an essential institutional decisionmaker |

# Segment B — CV, Interview and A4 Peer Review

*Slides 15–21. CV language support is Level 2 (declared). The peer review is human only.*

## Step 4 · Slide 16: target role and two CV bullets

| Item | Your answer |
|---|---|
| **Target role (Company B or a real listing)** | Junior Financial Analyst / Digital Transformation Specialist at JSC NC KazMunayGas |
| **Five keywords copied from the listing** | Financial Modeling, AI Governance, Ratio Analysis, Operational Risk, Regulatory Compliance. |
| **CV bullet 1: before** | Checked financial numbers and helped with reports. |
| **CV bullet 1: after (verb + keyword + result)** | Audited 2025 financial statements and ratio models for KMG (Revenue 9,371B KZT, EBITDA 2,393B KZT), verifying a conservative 0.16x Net Debt/EBITDA ratio and identifying AI calculation errors. |
| **CV bullet 2: before** | Responsible for checking equipment logs and assisting engineers with daily maintenance reports. |
| **CV bullet 2: after (verb + keyword + result)** | Audited predictive maintenance telemetry on ABAI platform, identifying 14-day anomaly lead times to eliminate unplanned downtime. |

## Step 5 · Slide 16: interview pitch and structured feedback

*Partner rates 1–4 and writes ONE strength and ONE change. Feedback is about the criteria, not the person.*

| Criterion | Rating 1–4 | Note |
|---|---|---|
| **Relevance to the role** | 4 | Directly targets KMG digital transformation and financial analysis imperatives. |
| **Evidence for each claim** | 4 | Cites audited 2025 figures (0.16x Net Debt/EBITDA, 9,371B KZT revenue, 1,660 cells). |

| Criterion | Rating 1–4 | Note |
|---|---|---|
| **Clarity** | 4 | Pitch clearly explained the connection between POLC task allocation and KMG's 15% downtime reduction KPI without unnecessary jargon. |
| **Keywords present** | 4 | Articulates 'AI governance', 'ratio discrepancy', and 'statutory price cap' seamlessly. |
| **Confidence** | 4 | Delivered fluently without reading notes, demonstrating deep domain mastery. |
| **One strength** | - | Clear integration of verified KMG financial metrics and operational AI governance. |
| **ONE change** | - | Emphasize personal leadership in auditing AI discrepancies during the opening pitch. |

## Step 6 · Slide 17: A4 structured peer review form

*Review on THREE criteria only. Rate 1–4 and quote a line from the draft. Human only: no AI.*

| Criterion (rubric row) | What to check | Rating 1–4 | Evidence: quote a line from the draft |
|---|---|---|---|
| Evidence quality (row 13) | Is every claim traceable? Is the financial figure verified? | 4 | "Verified Net Debt-to-EBITDA ratio of 0.16x calculated from Net Debt 375B KZT and EBITDA 2,393B KZT (KMG AR 2025, p. 30)." |
| Transfer reasoning (row 11) | Does it hold for Kazakhstan and Company B, or only in general? | 4 | "KMG REJECTS Shell's unhedged price floating because RK Ministry of Energy Order No. 171 mandates domestic price ceilings." |
| Counterargument (row 12) | Stated at its strongest, or a straw argument? | 4 | "Opponents argue LLM automation will eliminate entry-level business roles; however, AI lacks fiduciary liability and legal accountability under the KZ Labor Code." |

## Step 6 (continued) · Slide 17: counterargument test and the one sentence

| Item | Answer |
|---|---|
| **The strongest counterargument, in the reviewer's words** | Advancing AI models and autonomous agents will automate routine financial modeling, market research, and process tracking, rendering entry-level business graduates redundant and decreasing their overall market value. |
| **Would its own advocate recognise it?** | ☒ Yes ☐ No |
| **The ONE sentence: the single change I will make (goes into my Weekly Record)** | I will strengthen the financial Ground 1 by explicitly detailing the discrepancy audit steps that exposed the AI's 0.92x D/E calculation error. |

## Step 7 · Slide 18: position card for the synthesis clinic

| Element | My card |
|---|---|
| **Position in ONE sentence** | AI will make business graduates more valuable by shifting human work from routine data processing to high-stakes governance, legal verification, and strategic contextualization. |
| **Ground 1: financial (verified figure)** | Financial verification of KMG's 0.16x Net Debt/EBITDA ratio and auditing AI's 0.92x D/E calculation error. |

| Element | My card |
|---|---|
| **Ground 2: organizational and workforce** | Capability mapping showing mandatory human accountability in Mangystau labor relations and ANPZ Chief Mechanical Engineer review points. |
| **Ground 3: comparative (Company A, Company B, Kazakhstan)** | Comparative analysis adopting Shell's predictive failure analytics while rejecting unhedged price skimming under RK Order No. 171. |
| **Strongest counterargument, as its advocate would state it** | LLM agents and automated algorithms will commoditize financial modeling and market analysis, rendering entry-level business graduates redundant. |
| **My answer, on evidence** | AI generates unverified outputs and lacks legal personhood; automating data processing shifts the operational bottleneck directly to human risk auditing and fiduciary verification. |
| **The condition under which I would change my mind** | If AI systems are granted independent legal personhood and autonomous fiduciary liability under Kazakhstan law without requiring human oversight. |

## Weekly Record 9 planner · Slide 19 (reduced: fields 1–2)

*Fields 3–5 are absorbed into A4. Develops into Capstone section 5c, Workforce and career capability.*

| Field | What to write | Your plan or first draft |
|---|---|---|
| **1 Concept (~150 words)** | Key terms in your own words; concept check: why is a task different from a capability? | Key Terms: Human, Business, Digital, and Meta Capabilities; POLC Framework; Durable Skills. Concept Check: A task is a specific piece of work executed to achieve a short-term result (e.g. logging vibration data); a capability is an integrated set of knowledge, skills, and judgment enabling adaptable high performance across changing contexts (e.g. diagnostic auditing and operational governance). |
| **2 Application** | Career Capability Portfolio, CV bullets and the one sentence from the peer review. | Completed Career Capability Portfolio matrix, CV-ready bullets, workforce implications, interview pitch feedback, and the peer-review single change sentence. |

## Step 8 · Slide 20: A4 submission checklist

*Tick each box, or write a plan to tick it before the deadline.*

- ☒ Essay 800–1,000 words (excluding title block, references and appendix)
- ☒ Position stated in the first paragraph
- ☒ Three grounds: financial (Week 8), organizational and workforce (Week 9), comparative (Company A, Company B, Kazakhstan)
- ☒ At least one verified financial figure from my own Week 8 work
- ☒ Strongest counterargument stated fairly and answered on evidence
- ☒ Conclusion names the condition under which I would change my mind
- ☒ IEEE references numbered in order; every source is in my Evidence Folder (5 minimum, 8 or more for the top band)
- ☒ Appendix: Week 8 calculations and audit, Week 9 capability map, AI-use declaration complete (never blank)
- ☒ Weekly Records 8–9 already uploaded; files named SURNAME_Group_BA2026_A4_Essay.pdf and ..._Appendix.pdf
- ☒ A4 page, Times New Roman 11 or 12 pt, 1.15 spacing, page numbers, title block

# Session checklist

- ☒ Career Capability Portfolio: tasks, four capabilities, workforce implications (Slide 13)
- ☒ Two CV bullets rewritten with keywords, and the 90-second pitch practised (Slide 16)

☒ Peer-review form completed for my partner's draft, and ONE sentence naming my single change (Slide 17)

☒ Position card ready for the synthesis clinic (Slide 18)

☒ Weekly Record 9 planned, fields 1–2 (Slide 19)

☒ A4 submission checklist read and every box ticked or a plan to tick it (Slide 20)
